Exercise Shoutouts to Everyone in python

Question

Write a program to pronounce list of names using win32 API. If you are given a list as follows:

```
l=["Munawar","MarZi@","Harry","Kamal"]
```

Your program should pronounce:

Shoutout to Munawar

Shoutout to MarZi@

Shoutout to Harry

Shoutout to Kamal

Note. If you are not using windows. Try to figure out how to do the same thing using some other package.

Source Code

```
l=["Munawar","MarZi@","Harry","Kamal"]

# Your program should pronounce:
# Shoutout to Munawar
# Shoutout to MarZi@
# Shoutout to Harry
# Shoutout to Kamal
# Note. If you are not using windows. Try to figure out how to do the same thing
using some other package.
```

Thank You
