Exercise 2 Good morning Sir

Problem

Create a python program capable if greeting you with Good morning. Good afternoon and Good evening. Your program should use time module to get the current hour. Here is a simple program and documentation link for you.

Example

```python
import time
timestamp=time.strftime('%H:%M:%S')
print(timestamp)
timestamp=time.strftime('%H')
print(timestamp)
timestamp=time.strftime('%M')
print(timestamp)
timestamp=time.strftime('%S')
print(timestamp)
```

Source Code

```python
import time
timestamp=time.strftime('%H:%M:%S')
print(timestamp)
timestamp=time.strftime('%H')
print(timestamp)
timestamp=time.strftime('%M')
print(timestamp)
timestamp=time.strftime('%S')
print(timestamp)
```

Solution

```python
import time
timestamp=int(time.strftime('%H'))
print(timestamp)
```

```python
if(timestamp<9):
    print("Good Morning Sir :")
elif(timestamp>=10 and timestamp <= 3):
    print("Good afternoon Sir")
else:
    print("Good Evening Sir")
```

Thank You

```python
if(timestamp<9):
    print("Good Morning Sir :")
```
